L3 Security & Detection Systems to Showcase Its ClearScan® Checkpoint CT Scanner, the Only Checkpoint Solution With EU C3, at Passenger Terminal EXPO 2018

WOBURN, Mass., March 16, 2018 – L3 Security & Detection Systems (L3 SDS) announced today that it will showcase its industry-leading aviation checkpoint solutions at Passenger Terminal EXPO 2018 being held March 20–22 in Stockholm, Sweden. Attendees are invited to visit L3 SDS in Stand 1110 for demonstrations and to learn more about its ClearScan® checkpoint CT scanner, the only computed tomography (CT) system qualified to the European Civil Aviation Conference (ECAC) C3 Standard, the most rigorous standard in the world today.

L3's ClearScan is the most widely deployed checkpoint CT on the market, with installations in the U.S., Europe, the Middle East, Africa and Asia. When coupled with the company's Mach-SmartLane®, a best-in-class automated screening lane, the combined system has the highest operational throughput in the industry. In addition to ClearScan and Mach-SmartLane, the company will feature its Mach-Secure® network suite that integrates data from checkpoint screening systems and provides real-time operational analytics to airport stakeholders.

“We look forward to meeting with and demonstrating our security solutions to thought leaders at the Passenger Terminal EXPO,” said Pak Chin, President of L3 Security & Detection Systems. “Our integrated, scalable solutions enable us to provide our current and future customers with tools that optimize their productivity and operating efficiencies, as well as deliver the best security options.”

About L3 Security & Detection Systems

With systems deployed and supported around the globe, L3 Security & Detection Systems (L3 SDS) is a leading supplier of security screening solutions. For more than 30 years, L3 SDS has developed and manufactured cutting-edge products using advanced technologies that include networking; 3-D computed tomography; automated, conventional and high-energy X-ray; radiation detection; active millimeter wave imaging; metal detection; and energetic trace explosives detection. L3 SDS solutions are used by the aviation and transportation industries, regulatory and

customs authorities, government and law enforcement agencies, and commercial and other secure facilities. Applications include the screening of people, vehicles, baggage, cargo and packages for explosives, firearms, drugs, contraband and corporate assets. To learn more about L3 SDS, which is part of the Security & Detection Systems sector within L3's Electronic Systems business segment, please visit the company's website at www.L3T.com/SDS.

Headquartered in New York City, L3 Technologies employs approximately 31,000 people worldwide and is a leading provider of a broad range of communication, electronic and sensor systems used on military, homeland security and commercial platforms. L3 is also a prime contractor in aerospace systems, security and detection systems, and pilot training. The company reported 2017 sales of \$9.6 billion.
